

TECHNOLOGY SOLUTIONS IN PRACTICE

Sight and Sound Technology and XXX invite you to the Technology Solution in Practice CET Course worth 3 interactive CET points.

This course is specifically designed as an introduction to the technology solutions available to those with low vision, and how these devices and software can be used to improve quality of life. Working around 4 different scenarios, you will get the opportunity to see life through your patients' eyes, learn more about the solutions we provide and recommend the products most suited to each condition.
